

Technology Designed to Protect Your Assets

Elite Pro Offers Our Lenders the Ultimate Blend of Functionality and Flexibility

PAYMENT MANAGEMENT & RECOVERY FUNCTIONALITY

The PassTime Elite Pro platform provides lenders with a flexible and cost effective entry into our Pro Series of products. Elite Pro comes as a standalone unit that is customizable and can be configured in one of three ways.

The Elite Pro platform provides our lenders with the ultimate combination of functionality and flexibility for managing their portfolios, therefore allowing you to focus more on your business.

Each of the three unique configurations provides both dealers and lenders with the ability to perform manual and automatic payment management, as well as asset tracking and recovery functionality.

Our Pro Series also provides you with a regular weekly automated wireless communication as well as the option to increase that frequency of communication. That way you can focus on doing what you do best while being reassured that your assets are always protected and safe.

Call today for more info about the benefits of utilizing the Elite Pro platform in your business model and be sure to ask your PassTime representative about our new and expanded service packages available to you through the Elite product line!
