

Technology Designed to Protect Your Assets

## PassTime GPS Utilizes the Latest GSM Technology for Tracking and Asset Recovery

### AN ASSET MANAGEMENT AND RECOVERY TOOL

The PassTime GPS product solution provides lenders with the latest in GSM based tracking technology. PassTime GPS is designed for lenders who are principally concerned with asset protection and recovery technology at an economical price.

With PassTime GPS you can login to your own private website where you can manage all your PassTime GPS equipped vehicles: perform vehicle tracking, establish Geo-Fence parameters, and send remote wireless vehicle disable commands.

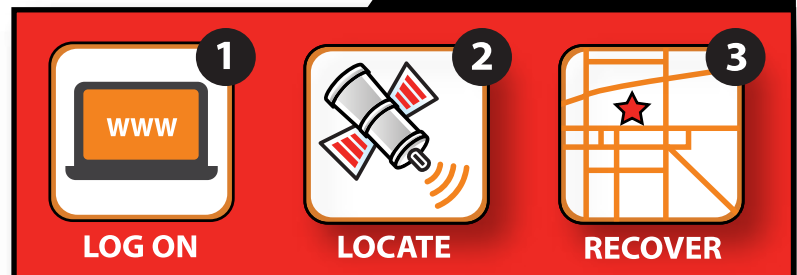

PassTime GPS is designed to disable and enable a vehicle's starter circuitry. This allows a dealer to immobilize the vehicle by preventing it from starting, thereby facilitating a quicker and smoother recovery process. PassTime GPS takes the worry out of locating an asset and allows the user to focus on their business.
