

Technology Designed to Protect Your Assets

The New 'Stealth' Code-Based Solution from PassTime that Modifies Consumer Payment Behaviors.

A PAYMENT BEHAVIOR MODIFICATION TOOL

PassTime Plus stealth is the latest evolution of the original PassTime Plus product. The new PassTime Plus unit uses wireless technology that greatly simplifies the installation. Also, by eliminating the Infra-Red reader eye the PassTime Plus unit is easier to conceal as there is no external cable that can be traced back to the unit. PassTime Plus is the only code-based starter-interrupt product on the market that provides flexible payment codes, pre-programmed Warning, Emergency codes and an optional Anti-theft functionality.

Our PassTime Plus product continues to build on the success of the original PassTime device by modifying consumer behavior, while providing payment assurance for the lender. The new PassTime Plus helps dealers and lenders utilize the payment device without displaying the device to the customers. It is the tool of choice for savvy dealers and risk adverse lenders who want to broaden their range of customers without subjecting their business to any other unnecessary risk.

PassTime Plus provides your business with the opportunity to increase sales while securing your loans for customers with "less than perfect" credit. The PassTime proprietary web-based software is easy to use, ultimately, helping you cut repossession and collection costs.
