

Technology Designed to Protect Your Assets

Trax Utilizes the Latest GPS Technology for Tracking and Recovery

THE GUARANTEED TRACKING SOLUTION

Trax is the latest "entry level" GPS Tracking product in the PassTime Suite of Products. The Trax product solution provides dealers and lenders with the latest in GPS tracking technology at an affordable price.

Trax has been designed for dealers and lenders who are particularly concerned with asset protection and recovery.

With Trax, dealers and lenders can log in to their own private website and perform real-time vehicle tracking of all of Trax equipped vehicles. Automated 72 hour tracking provides access to detailed vehicle history reports.

Trax is equipped with internal antennas for both cellular and GPS in order to allow the device be mountable virtually anywhere in the vehicle for easy and inexpensive installation.

- **Install Verification Service (IVS) Ensures Device is Installed Properly**
- **Digital GSM Network Coverage**
- **Real-time GPS Satellite Tracking**
- **State Of The Art Mapping**
- **Easy To Use Web Interface**
- **72 Hour Automated Locates**
- **Internal Antennas**
- **Simple 2 Wire Installation**

Call today for more info about the benefits of utilizing PassTime in your business model.

PassTime™ USA is headquartered in Littleton, Colorado and was founded in 1992. PassTime has developed the PassTime Suite of Products which starts with our "entry level" GPS Tracking and a non-wireless Code Management System and moves into our Elite Product Line with the dual capabilities of a wireless, Code Management System with GPS Tracking. Our entire Suite of Products is designed to improve customer payment performance and reduce default and repossession risks. PassTime designs and manages ALL of our own product development and support systems to ensure maximum flexibility in meeting the needs of a highly diverse industry of car dealers and special finance companies.
